WORK EXPERIENCE

2018 -

Software Engineer, Udemy Instructor

Erkan Keskin Digital

I have been dealing with my own projects since 2018. I am a software instructor.

2014-2018

Software Engineer

PROMOQUBE

I prepared the software for social media campaigns of big companies such as Turkey İş Bankası, Skoda, Borusan Holding, ISUZU, Kuveyttürk, Neutrogena, LG, Flormar, Welder from beginning to end. I have monitored and reported the healthy operation of these software.

2013

Software Engineer

Alternatif Medya

I prepared the main portal and video portal of the Istanbul fair center from beginning to end.

2012-2013

Software Engineer

Komuneo

I prepared facebook page tab and canvas applications of brands. Among the brands I worked with, there were big companies such as Mavi Jeans and Finansbank.

2010 - 2011

Software Engineer

Made in Ajans

I prepared interactive software for medium and large companies.

2005-2006

Webmaster

Nethizmet Bilişim Hizmetleri

I produced simple html pages.

HOBBIES AND INTERESTS

I am a Udemy instructor, youtube content producer and blogger. I do not earn my life financially from these jobs. Therefore, these can be considered hobbies. I like to touch people's lives in a positive way.

“

I think about how we can develop software better, how we can work more efficiently. I often meet with most of my colleagues on this subject and brainstorm. I love personal development. Reading is among my favorites. I am not developing fast code. I like to be careful and meticulous. I don't do business just to get business done. It must have some logic. I love linux.

SKILLS

php, python, django, flask, vanillajs, es6, html5, css, scss, reactjs, mysql, postgresql, rest api, codeigniter, laravel, linux server management, nginx, apache
